Vision and Story of EZYPRO

The story of **EZYPRO** is deeply personal. It began not just with a software idea, but with a lived experience—over 3 decades of being in the field, solving problems, managing teams, navigating delays, and understanding the everyday challenges of construction industry in Pakistan. Engr. Shahzad Ayub, along with his team, envisioned a solution that could bring together clients, consultants, and contractors on a single digital platform—where transparency, real-time communication, and control could finally become standard, not a struggle.

This journey started in 1999 with the establishment of Shahzad Ayub Associates, a firm that went on to design and engineer a wide range of complex structures—housing schemes, high-rises, tunnels, industrial facilities, and telecommunication towers. In 2013, the vision expanded with Elite Engineering Pvt. Ltd., an EPC company delivering turnkey solutions for oil terminals, pipelines, gas stations, and more. And in 2023, Shahzad Ayub Associates took on the complete design and project management of New Metro City, a large-scale real estate initiative across five major cities.

EZYPRO is the natural evolution of this legacy—a cloud-based construction project management solution shaped by real work, real teams, and real deadlines. It took three years to build and rigorously test **EZYPRO** across live projects. Today, it stands as a product of passion, precision, and persistence—a platform built not just for efficiency, but for trust and collaboration in every project.

WHY CHOOSE EZYPRO

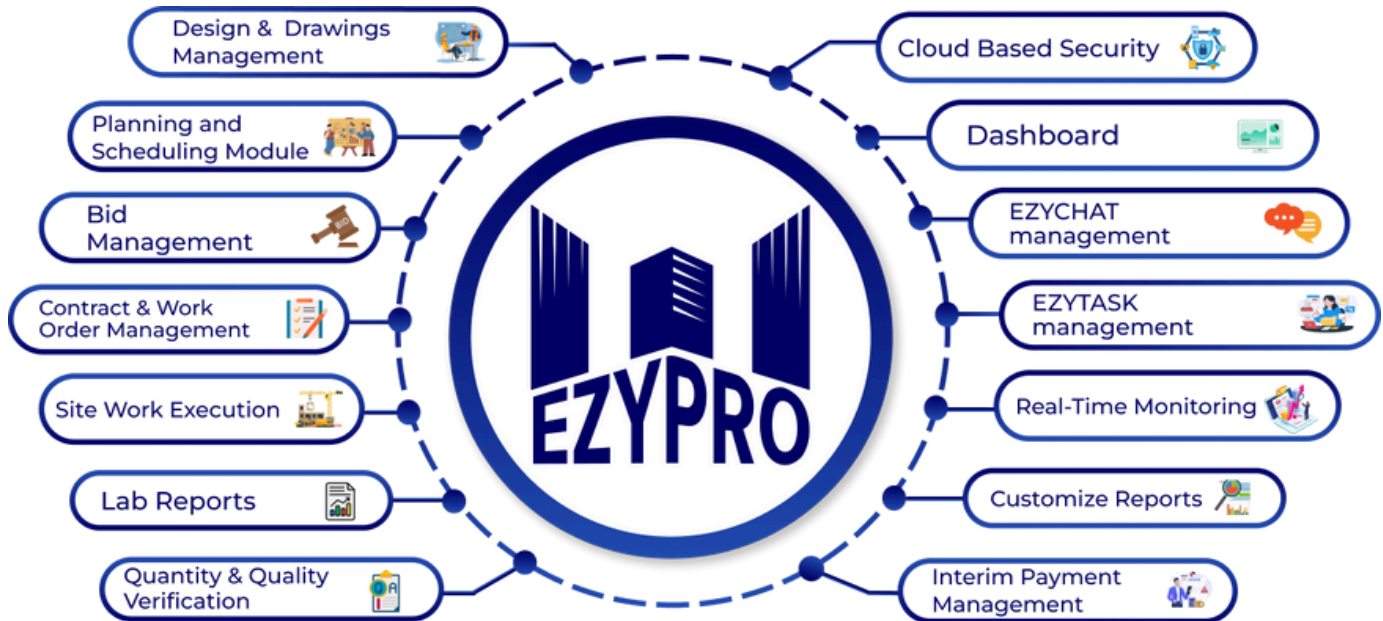

In today's rapidly evolving construction landscape, the pressure to deliver projects on time and within budget is higher than ever.

EZYPRO isn't just another project management tool; it's your all-in-one Project Management Assistant. With EZYPRO, you get 360-degree visibility—not only over each project but over your entire business.

FEATURES OF EZYPRO

Complete Construction Project Management Software

Design, Drawings Management

Manage design stages with multiple approval levels to ensure Proper execution and compliance.

Planning & Scheduling

Streamline construction with WBS breakdown, BOQ linkage, and Gantt Charts for tracking timelines and project milestones

Bid Management

Streamline bidding with digital submissions, custom approvals, and trackable evaluations

Contract & Work Order Management

Simplify task allocation and tracking—keeping every team member aligned and informed in real time

Site Work Execution

Boost on-site efficiency by planning, tracking, and managing tasks for seamless execution and timely results

Lab Reports

Make informed decisions with timely lab data.

Quantity & Quality Verification

Marinating high standards with detailed quality assurance and control checklist

IPC & Liability Management

Easily generate Interim Payment Certificates and manage liability sheets to mitigate risks.

Streamline entire workflow

EZYPRO stands out as the only construction management software you can customize to match your workflow
